Sound City Center Stage  
15466 Cabrito Road  
Van Nuys, CA 91406

## **Movies & TV & Interactive**

EnterAktion Studios is primarily concentrating on the production of computer animated motion pictures. EnterAktion Studios successfully completed production of its computer animated motion picture, "Dwegons" in early January 2010. The movie was directed, produced and co-written by Tom Walsh, and executive produced by Ronald J. Hilton. EnterAktion Studios is currently in production on their next computer animated motion picture, "Losopolis", which is also being directed and produced by Tom Walsh, and executive produced by Ronald J. Hilton. Additionally, the company has completed all development on two additional computer animated motion picture projects, "Electric Forest" and "The Adventures of Captain Sea", that will go into production following "Losopolis". For these projects, EnterAktion Studios has already created hundreds of original creatures and characters, designed fantasy worlds and written the screenplays.

EnterAktion Studios has a China co-production venture to produce new computer animated motion pictures with Asia Legend/Legendtoonland that has a state of the art computer animation facility in Zhuhai, China, and offices in Hong Kong. EnterAktion jointly produced "Dwegons" in this production venture.

EnterAktion Studios has a worldwide toy contract with the international toy company, JOKER AG/SA for its "Dwegons" and "Losopolis" motion picture projects.

Separate of their on-going motion picture productions, EnterAktion Studios has also completed production on several new computer animated prime-time pilots including, "The Kernies", "Newsoes" and a pilot combining live action actors and virtual sets called, "14 Stories". Additionally, EnterAktion produced a syndication TV pilot called "Kidsline".

Enteraktion Studios is also actively involved in developing videogame spin-offs from its motion picture projects, utilizing the digital elements, computer environments and characters from the company owned movie projects.

EnterAktion movie productions are uniquely developed as videogame projects simultaneously; developing digital elements for *both* mediums as the movie scripts are being developed. EnterAktion is also in active development on creating two new original and fantastical "Virtual Worlds" for the internet and other forms of web entertainment.

Director, Producer-Writer, Tom Walsh leads the EnterAktion creative team being the key creator/co-writer of Company movie-TV-Interactive projects.

### **Electric Forest**

Prepare to embark on the adventure of a lifetime, because the *Electric Forest* is unlike any place or thing you have ever seen. In every park, city and town throughout the world, there is a magical portal that leads to the *Electric Forest*. The path to this mystical destination only becomes available at a precise moment during a thunderstorm, and once you're in, you'll find that all of the plants and trees display vivid, vibrant colors that change right before your eyes! In fact, these plants and trees are so diverse in their color combinations that the traditional green almost becomes a rarity. The *Electric Forest* is the flip side of reality. It is a wondrous place where everyone has a family and a home...where no one is allowed to be sick or lonely...and where you will not find the troublesome burdens of money.

Designed to be the first major computer animated musical, *Electric Forest* will take the computer animation medium to the next visual level. With 14 original songs that have already been written, produced and recorded, and 67 different creature characters with a multitude of fascinating personalities, *Electric Forest* is perfect for the whole family.

### **The Adventures of Captain Sea**

*The Adventures of Captain Sea* is a seafaring adventure into worlds that have yet to be discovered. When our hero Captain Sea, his fearless first mate, and a sneaky stowaway get sucked into a giant ocean whirlpool, they land in a colorful world known as "Alterra". Comprised of several islands that contain fantastical creatures and some dangerous environments, their sail through "Alterra" is an adventure of a lifetime.

*The Adventures of Captain Sea* is a full-length computer animated motion picture. As the first installment of an exciting action/adventure trilogy, this film alone has over 90 original creatures created specifically for this movie by EnterAktion's creature department.

## **Losopolis**

11-year-old Kyra and her 9-year-old brother Brennan must spend a few days at their grandmother's while their mother is away on a business trip. However, their ordinary visit to grandma's apartment soon becomes *extraordinary* when they realize their mother has mysteriously vanished! Through the help of a strange looking elevator operator, the kids stumble upon an entirely different universe filled with wild and imaginative characters. This is one adventure that is sure to be unparalleled to any you have been on before.

Think of *Losopolis* as "The Wizard of Oz" meets "Harry Potter", all located in the "Twilight Zone". It contains more than 85 original creatures and over 9 fascinating worlds, all having been specifically designed for this unique project.

## **Dwegons**

There is a world so fantastical that no human being would ever believe it exists...and that's exactly what the inhabitants of this world want you to believe. Of course, it helps that this world is located deep under the earth's surface, and the few existing entrances are very well hidden. That being said, it's safe to say that The Fitzgerald family is in for quite a surprise when they open their new Country Inn directly above this hidden world, and meet their new colorful *Dwegan* neighbors...

This completed computer animated motion picture after years of creative development and design, has been in production for two and half years. *Dwegons* includes a whole race of creatures, each with a unique personality, living in their own underground civilization. To top it all off, this exciting film also contains a Dwegan rock band known as "The Cave Flyers", featuring an entire C.D. of original music that was scored and performed specially for this film.
