Electric Forest:

Prepare to embark on the adventure of a lifetime, because the *Electric Forest* is unlike any place or thing you have ever seen. In every park, city and town throughout the world, there is a magical portal that leads to the *Electric Forest*. The path to this mystical destination only becomes available at a precise moment during a thunderstorm, and once you're in, you'll find that all of the plants and trees display vivid, vibrant colors that change right before your eyes! In fact, these plants and trees are so diverse in their color combinations that the traditional green almost becomes a rarity. The *Electric Forest* is the flip side of reality. It is a wondrous place where everyone has a family and a home...where no one is allowed to be sick or lonely...and where you will not find the troublesome burdens of money.

Designed to be the first major computer animated musical, *Electric Forest* will take the computer animation medium to the next visual level. With 14 original songs that have already been written, produced and recorded, and 67 different creature characters with a multitude of fascinating personalities, *Electric Forest* is perfect for the whole family.
